Managing an Amazon business is not just about listing products and hoping they sell. It is a relentless cycle of inventory planning, advertising adjustments, policy compliance, and customer service. For many sellers, Amazon Seller Central feels less like a sales channel and more like a full-time crisis management job. One day your ACoS is skyrocketing; the next, a crucial listing is suppressed because of a vague policy violation.

Trying to handle every aspect of your seller account alone often leads to burnout and missed opportunities. You might be making sales, but are you actually profitable? Are you missing out on the Buy Box because of pricing errors? Are your listings truly optimised for the latest search algorithm updates?

Professional Amazon account management services bridge the gap between struggling to survive and actually scaling. We take the day-to-day operational burden off your shoulders, allowing you to focus on product development and big-picture strategy while we ensure your account runs smoothly, compliantly, and profitably.

Amazon is an incredibly competitive marketplace. With millions of sellers vying for attention, the margin for error is razor-thin. A single mistake can cost you thousands in lost revenue or, worse, lead to account suspension. When you invest in professional management, you are not just buying time back. You are mitigating risk. An expert team spots potential issues before they become suspensions, understands the nuances of the A9 algorithm, and knows how to navigate Seller Support to get actual resolutions.

WHAT WE OFFER

Our Amazon Account Management

Amazon Seller Central Account Management

Think of us as your daily operations team. We handle the complete day-to-day running of your Seller Central account, monitoring KPIs like Order Defect Rate, Late Shipment Rate, and Valid Tracking Rate, handling the critical tasks that keep your account in good standing.

Product Listing Optimisation

Great products do not sell if customers cannot find them. We conduct deep keyword research, rewrite titles, bullet points, and descriptions to balance SEO with persuasive copy, optimise backend search terms, and guide your images and A+ Content to maximise conversion.

Amazon FBA & Order Management

Inventory management is the backbone of a successful FBA business. We manage FBA shipments to avoid check-in delays, handle FBM order processing where applicable, and manage returns, analysing reasons to identify product or listing issues.

Amazon Advertising (PPC) Management

Advertising on Amazon is essential but easily becomes a money pit. We manage Sponsored Products, Brands, and Display campaigns with granular keyword targeting, regular bid optimisation, and negative keyword management to lower your ACoS while increasing total sales.

Account Health & Compliance Management

Your Account Health dashboard is the most critical page in Seller Central, and we monitor it daily. We act immediately on policy warnings, fix suppressed listings, and draft Plans of Action and appeals when needed.

Pricing, Buy Box & Competitor Strategy

Winning the Buy Box is non-negotiable. We implement smart pricing that keeps you competitive without a race to the bottom, and monitor competitors closely so we can adjust your strategy proactively.

AI & Data-Driven Amazon Optimisation

Modern selling requires modern tools. We use advanced data analytics and AI-driven software to forecast demand, predict seasonal

trends, and make smarter inventory and ad-spend decisions.

HOW WE WORK

Our Process

We don't guess; we plan. Our process is data-driven and transparent.

1

Account Audit & Business Analysis

We thoroughly audit your current setup, looking for health risks, listing errors, and wasted ad spend.

2

Growth Opportunity Identification

We pinpoint the low-hanging fruit, the immediate changes that boost sales or profitability.

3

Listing, Ads & Operational Optimisation

We execute the work: rewriting listings, restructuring ad campaigns, and fixing operational bottlenecks.

4

Performance Tracking & Reporting

We monitor the results of our changes and provide regular updates on your key metrics.

5

Continuous Improvement & Scaling

Amazon changes fast, so we constantly refine strategies and test new tactics to keep growth moving upward.

Why Choose HitupSolutions for Amazon Account Management

We do not just manage accounts; we act as your operational partner, having been in the trenches of Seller Central for years.

Real Seller Experience

We have managed real accounts with real budgets and know the panic of a suspended listing and the thrill of a successful Prime Day.

Deep Policy Knowledge

Amazon policies change constantly. We stay ahead of the curve so you are not caught out by a sudden compliance update.

Profit-First Mindset

We do not just chase sales volume; we optimise for healthy margins and sustainable growth.

Transparent Communication

You get clear, honest updates on what is working and what needs fixing.

Proactive Issue Resolution

We monitor your account daily to catch red flags early, rather than waiting for problems to escalate.

Dedicated Support

You get a dedicated account manager who knows your brand, your products, and your goals inside out.

WHAT TO EXPECT

Results You Can Expect

01 Improved account health metrics, meaning less risk of suspension.

02 Better visibility for your listings through improved Amazon SEO.

03 A more controlled ACoS and better efficiency in your ad spend.

04 Consistent, sustainable sales growth rather than lurching from crisis to crisis.

05 A business that runs efficiently, freeing you to focus on products and strategy.
